

SHAPE SPINNER

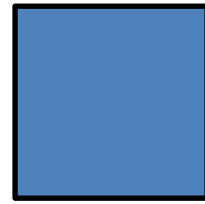

Directions for making the game: Print out the game boards onto cardstock and laminate for durability (the final game board is in black and white, so if you don't want to print in color you can just make copies of this game board on colored paper). Print out the spinner and attach a brad in the middle of the spinner. Put a paperclip on the brad to make the spinner.

Directions for playing the game: Each student takes a "Spin a Shape" game board and a handful of bingo chips (or whatever markers you want to use). Students take turns spinning a shape, telling the other students what the name of the shape is, and then covering up that shape on their game board with a bingo chip. The first player to cover all of the shapes on their game board wins.
