

Round to the Nearest Hundred

Directions: A stack of cards (digits 0-9) is placed face down on the board. Each player takes three cards from the card deck and places them on the board in the order drawn. Players round their numbers to the nearest hundred. Each player describes his/her number using the sentence frame. The player with the largest number when rounded takes all six cards. Play continues until all cards in the deck have been used. The player with the most cards wins the game.
